Project Summary

Gender equality is a topic of increasing relevance in the EU and worldwide, but its measurement is mainly limited to national levels. During the past years, various experiences tried to exploit gender equality at a subnational (regional) level, but they remained country-specific and limited to specific domains. The ongoing Jean Monnet Regional Gender Equality Measurement in the EU (ReGEM) project aims at providing a regional mapping of the most comprehensive gender equality indicator in Europe, the Gender Equality Index (GEI) of the European Institute on Gender Equality (EIGE). This measure covers 14 sub-domains and is available for all 27 Member States of the EU and the UK. The ReGEM project will assess the data availability at the NUTS2 (regional) level and the feasibility of constructing a Regional Gender Equality Index (R-GEI), identifying a consistent system of indicators which can be used as a common basis for gender equality measurements at regional level in Europe. The project will provide a preliminary analysis of the structure and evolution of regional gender (in)equality by comparing four major EU countries (Italy, France, Spain and Germany), covering a total of 98 regions.

Short bios:

Enrico di Bella is Associate Professor of Social Statistics at the University of Genoa, Italy. His research focuses on the application of statistical methods in the social sciences along the whole process of knowledge construction and understanding of social phenomena. He is the Academic Coordinator of the Jean Monnet Erasmus+ project on Regional Gender Equality Measurement in the EU, Co-Editor of the journal *Social Indicators Research*, and section editor of the *Encyclopaedia of Quality of Life and Well-Being Research*.

Sandra Fachelli is Associate Professor at the Department of Sociology of Universidad Pablo de Olavide, Seville and teaching coordinator and professor of the Master's Programme in Applied Social Research Techniques. She is currently president of the Research Committee 06 on "Inequality and Social Stratification" of the Spanish Federation of Sociology (FES). Her main lines of research are inequality, stratification and social mobility, higher education, and employment.

Pedro López-Roldán is Associate Professor at the Department of Sociology of the Autonomous University of Barcelona (UAB) and currently president of the Research Committee 41 on "Comparative Sociology between Europa and Latin America" of the Spanish Federation of Sociology (FES). His main lines of research are social research methods (multivariate data analysis, typological construction, mixed methods), sociology of labour, and social inequalities.

Christian Suter is Full Professor of Sociology at the University of Neuchâtel, Switzerland. He is currently president of the Research Committee 55 on "Social Indicators" of the International Sociological Association and Co-Editor of the journal *Social Indicators Research*. His research focuses on social and economic inequalities, social indicators and quality of life, social bonds and attachment regimes, as well as on globalization and world society.

Fabrizio Culotta is a post-doctoral researcher in Economic and Social Statistics at the Department of Political Science, University of Genoa. He obtained a Ph.D. in Economics from the University of Padua in 2019. His current research focuses on population ageing, labour markets and pension systems.
